DEMOLITION OF A BUILDING

The applicant for a permit respecting the demolition of a building shall retain a professional engineer to undertake the general review of the project during demolition, where:

- a) the building exceeds three storeys in building height or 600 m² (6460 ft) in building area;
- b) the building structure includes pre-tensioned or post-tensioned members;
- c) it is proposed that the demolition will extend below the level of the footings of any adjacent building and occur within the angle of repose of the soil, drawn from the bottom of such footing, or;
- d) explosives or a laser are to be used during the course of demolition.

Where a permit is required for the demolition of a building referred to above, descriptions of the structural design characteristics of the building and method of demolition shall be included in the application for a permit to demolish the building.

The owner or authorized agent hereby warrants that all services have been disconnected to the satisfaction of the services purveyor, and further that all abandoned wells and septic tanks have been decommissioned by licenced contractors.
